SUMMARY

Software Test Engineer at Wipro focused on Windows feature validation, manual testing, regression testing, defect reporting and release readiness. Trained as a full-stack developer in Python and Java, which helps in understanding how software fails and in writing defect reports that developers can act on. Currently learning cybersecurity.

EXPERIENCE

- Project Engineer · Wipro**
Hyderabad (Hybrid) · Windows Feature Testing / QA · Project K2 (client project)

Mar 2025 – Present

 - Execute manual test cases and validate them against expected Windows feature behaviour.
 - Perform edge-case and negative testing to find failures before release.
 - Log defects with clear reproduction steps and expected vs actual results.
 - Retest fixes and run regression checks before releases.
 - Validate builds for release readiness, working with development and project teams.
- Software Engineer Intern · RPS Consulting**
Remote

Dec 2024 – Mar 2025

 - Python full-stack training and project work.
- Software Trainee Engineer · Trisun Technologies**
On-site

Jul 2024 – Sep 2024

 - Java / full-stack development and testing.

PROJECTS

- CRM Web Application · Full-stack project**
Python, Flask, SQLAlchemy, MySQL, PyMySQL, HTML, CSS, JavaScript, Bootstrap, Fetch API, Flask-Migrate / Alembic

 - Customer relationship management web app with a Flask backend, a SQLAlchemy data layer on MySQL with Flask-Migrate / Alembic migrations, and an HTML, CSS and JavaScript (Bootstrap) frontend that communicates with the server through the Fetch API.
- IoT-Based Coal Mine Safety Monitoring & Alerting System · Academic project**
B.Tech final-year team project · Arduino, gas sensor, temperature sensor, smoke detector, buzzer, WiFi alerts

 - Monitors gas, temperature and smoke levels in a coal mine; when a reading crosses its safety threshold, the Arduino sounds a local buzzer and sends a phone alert over WiFi.

SKILLS

Testing	Manual Testing, Functional Testing, Test Case Design, Test Execution, Edge-Case & Negative Testing, Regression Testing, Retesting, Bug Reporting, STLC, Unit Testing, Debugging
Windows QA	Windows Feature Validation, Build Validation, Release Readiness, Defect Lifecycle
Programming	Python, Java, SQL, HTML, CSS, JavaScript
Backend / Database	Flask, SQLAlchemy, MySQL, PyMySQL, Flask-Migrate, Alembic
Tools	Windows, Python, Java, MySQL, Git, GitHub, VS Code, Docker

EDUCATION

- B.Tech, Electrical & Electronics Engineering · St. Martin's Engineering College**

2019 – 2022
- Diploma, Electrical & Electronics Engineering · Singareni Collieries Polytechnic**

2016 – 2019
- SSC · Krishnaveni Talent School, Godavarikhani**

2016

CURRENTLY LEARNING

Cybersecurity (in progress): ISC2 Certified in Cybersecurity (CC), SOC Level 1, CompTIA Security+.
